(54) Title: CABLE INFRASTRUCTURE AND ASSOCIATED SYSTEM

(57) Abstract: A cable infrastructure comprising multiple modular railway track sections assembled to form a continuous railway track base, each modular railway track section defining an internal longitudinal passageway (42) so that, when the multiple module railway track sections are assembled, a continuous passageway (42) is defined from one end of the assembled railway track base to the other end of the railway track base. A conduit is embedded within the internal passageway, the conduit in use to carry fibre optic or power cabling.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
