UNITED STATES PATENT OFFICE.

JOHN NORMAN SPENCER, OF SOUTH BERWICK, MAINE.

DESIGN FOR A HINGE MEMBER.

SPECIFICATION forming part of Design No. 33,222, dated September 18, 1900.

Application filed July 10, 1900. Serial No. 23,165. Term of patent 7 years.

To all whom it may concern:

Be it known that I, JOHN NORMAN SPENCER, a citizen of the United States, residing at South Berwick, in the county of York and State of
5 Maine, have invented and produced a new and original Design for a Hinge Member, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof.

10 The drawing represents a perspective view of a blind-hinge member, illustrating my new design.

The leading or material feature of the design consists of a hinge member 1, comprising a flat rectangular body portion and having disposed along one of its longitudinal edges a sleeve 2, which forms the knuckle of the hinge member. The sleeve or knuckle 2 is provided at opposite ends or at top and

bottom with reversely - extending V-shaped 20 projections 3, whereby the opposite end portions of the knuckle and hinge member have the same appearance and are, in fact, counterparts of each other. The sleeve or knuckle 2 is also somewhat less in length than the 25 body of the hinge member.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a hinge member, as herein 30 shown and described.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

JOHN NORMAN SPENCER.
