(54) Title: CONVERTIBLE MAT

(57) Abstract: A convertible mat that can transition from a first use position to a second use position. The convertible mat has a housing having a first section, a second section, and a hinge therebetween. The first section has a first cavity with a first opening opposite the hinge, and the second section has a second cavity with a second opening opposite the hinge. A first insert panel is inserted into the first cavity through the first opening, and a second insert panel is inserted into the second cavity through the second opening. Closure members are provided at each opening to retain the insert panels therein. A connector is used to removably secure the first section to the second section to form an acute angle therebetween in the second use position.
