(54) Title: SYSTEM AND METHOD FOR AUTOMATIC AND DIRECT ROUTING OF INFORMATION IN A NETWORK

(57) Abstract: A system and method of automatically routing a message between communication units in a network (figure 2) sends a first message (116) to a first server (106). A redirect message (118) is responsively received from the first server (106). The redirect message (118) comprises identification of a destination server (112) associated with a destination communication unit (119) and a target range. The target range includes a plurality of communication units associated with the destination server (112).
