(54) Title of the Invention: **Applying enhancements to visual content**
Abstract Title: **Applying enhancements to visual content**

(57) In a computer system having originating software configured to provide visual content for display on a display screen and enhancement software configured to apply enhancements to the visual content for display on the display screen, the visual content may be magnified, via the enhancement software, to a magnification level different from a size at which the visual content is provided by the originating software. In response to an instruction to change the magnification level, the magnification level to which the visual content is magnified via the enhancement software may be changed, and one or more enhancements, other than magnification, applied to the visual content via the enhancement software may also be changed.

FIG. 4
