To all whom it may concern:

Be it known that I, HENRY D. PERKY, a citizen of the United States, and a resident of Niagara Falls, in the county of Niagara and State of New York, have invented a certain new, original, and ornamental Design for Stoves; and I declare the following to be a full, clear, and exact description of the same, such as will enable others skilled in the art to which it pertains to make and use the invention, reference being had to the accompanying drawings, and to letters of reference marked thereon, which form a part of this specification.

Figure 1 is a side elevation of my stove. Fig. 2 is a plan view of the same.

As shown in the drawings, the leading or material feature of my design consists of the double-cylinder castellated form of the stove and the battlement projection \( \alpha \) around the upper portion of the wall disposed or arranged as shown in Fig. 1, said projection extending in horizontal line around the twin towers and across the plane portions of the wall. Between the cylinders or towers, \( c \) are the plane portions, \( d \) of the wall which connect the towers. Beads, \( e \) extend around the bottom and top of the stove.

Having described my invention, what I claim, and desire to secure by Letters Patent, is—

1. The ornamental design for a stove, as hereinafter shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

HENRY D. PERKY.

Witnesses:

B. L. HERRECK,
WM. H. FORD.
