(54) Title: Method, device and computer program product for determining colour transforms between images comprising a plurality of image elements
(56) Cited documents: ---
(57) Abstract:

The present invention relates to a method for changing the appearance of an original image comprising $N > 1$ classes of image elements, the method comprising the step of: for each pixel and for at least one subset of the original image: calculating N probability values, each probability value defining a probability for the pixel of belonging to a corresponding one of the N classes of image elements, transforming a color of the pixel by using predetermined color transforms for each of the N classes of image elements and the N probability values for the pixel.
