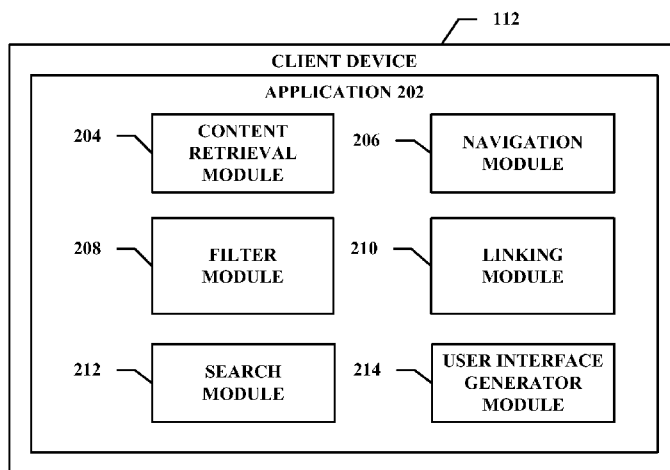

FIG. 2

(57) Abstract: A first selection of an aggregated content category is received from a plurality of aggregated content categories provided in a first portion of a user interface for an application for browsing and viewing media content. A second portion of the user interface is populated with media content items categorized in the selected aggregated content category. A second selection of a media content item of the media content items categorized in the selected aggregated category is received. The media content items are shifted to the first portion of the user interface, and the second portion of the user interface is populated with user interface panels relating to aspects of the selected media content item. A third selection of an indicator to view the aspects of the selected media content item is received. The user interface is regenerated to cause the display of only the user interface panels.
