(54) **Ink-jet print cartridge body**

(57) An opening extending to an outer surface of a cartridge body (12) is closed by a polymeric material sealant plug formed in situ. The cartridge body (12) includes an ink flow pathway which interconnects an ink reservoir chamber (22) to an exit port. The opening, which extends from a duct of the ink flow pathway of the cartridge body to the outer surface of the body, is closed by injecting a polymeric material into the opening. It is currently preferred to use a thixotropic material such as a thermoset urethane adhesive.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 11 1857

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
