- (54) Title:** STORAGE AND ORGANIZATION SYSTEM

Figure 1

(57) Abstract: A storage and/or organization system may be used to store and/or organize various items. For example, the system may include one or more panels and one or more attachment members, which may be connected to the panels and may be used to hold and/or position various items in desired locations. The attachment members may be selectively connected to and/or removed from the panels to provide a variety of storage and organization solutions. The panels may include, for example, one or more receiving portions to which the attachment members may be connected to and/or disconnected from using a snap, friction and/or interference fit. One or more portions of the panels and/or the attachment members may deform and/or deflect to provide the snap, friction and/or interference. One or more portions of the panels and/or the attachment members may remain deformed and/or deflected to provide a tension fit.
