(54) Title: OPTICAL SELF-HETERODYNE REMOTE ANTENNA SYSTEM

(57) Abstract

An apparatus and method are disclosed for use in an antenna remoting system. The apparatus comprises a single source of laser light having an output characterized by two distinct polarizations and at least two closely separated frequencies, and a fiber optic communications link joined to the source and having a modulator therein which is driven by a radio frequency information signal such that said modulator produces a beat frequency output which is a function of the sum of the two closely separated frequencies.

INTERNATIONAL SEARCH REPORT

International Application No.
PCT/US 93/11756

A. CLASSIFICATION OF SUBJECT MATTER
IPC 5 H01Q3/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 5 H01Q H04N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US,A,5 042 086 (COLE ET AL.) 20 August 1991 see claims 1-25; figures 1-6 see abstract ---	1, 17, 24
A	US,A,4 545 075 (MILLER ET AL.) 1 October 1985 see column 2, line 50 - column 3, line 32; figures 2-5 ---	1, 17, 24
A	EP,A,0 504 589 (DORNIER) 23 September 1992 see claims 1-11 ---	1, 17, 24
P,A	FR,A,2 691 265 (DEUTSCHE AEROSPACE) 19 November 1993 see page 4; figure 4 -----	1

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family

Date of the actual completion of the international search

20 June 1994

Date of mailing of the international search report

30.06.94
