(54) Title: DYNAMIC LOCATION OF A SUBORDINATE USER

(57) Abstract: Providing location information (410) to a supervisory user (405) providing a parental control, using a computer automatically to determine a location (410) of a subordinate user (407), and storing location information indicative of the location (410) of the subordinate user (407) in a database. A request of the supervisory user (405) to locate the subordinate user (407) is received and a user interface (415) informs the supervisory user (405) of the location (410) of the subordinate user (407) based on the stored location information. At least one of the storing and/or of the informing are based on the parental control.
