The present invention relates generally to a desk accommodating computer accessories (keyboard, mouse, screen, computer, printer) designed to resemble a theme appropriate for children (butterfly, princess, train, baseball, football, hockey, etc.) designed to support a flush mounted screen acting as a space saving solution.
CHILD THEMED DESK DESIGNED TO ACCOMMODATE COMPUTER COMPONENTS WITHIN DESK STRUCTURE

BACKGROUND OF THE INVENTION

[0001] The conventional child's desks are generally rather plain in appearance with all computer components exposed increasing the possibility of damage and misuse, and not space saving.

SUMMARY OF THE INVENTION

[0002] It is therefore the primary objective of the present invention to provide a child desk that is decorative and designed to protect computer accessories (keyboard, mouse, screen, computer, printer) from damage and misuse.

[0003] It is another objective of the present invention to provide a child desk that is versatile in design such that different themes can be accommodated to complement a child's room.

[0004] It is another objective to construct the desk using materials (wood, laminated wood, paint, plexiglass and plastic type materials) that are durable and easily cleaned and maintained.

[0005] It is still another objective of the present invention to save space by flush mounting a computer screen in the theme panel of the desk and accommodating the need to store the other components to allow the desk for other users other than exclusively being used as a "computer only" desk.

[0006] The objectives, features, functions and advantages of the present invention will be more readily understood upon thoughtful deliberation of the following detailed description of the present invention with reference to the accompanying drawings.

BRIEF DESCRIPTION OF THE DRAWINGS

[0007] FIG. A shows an front view of the present invention.

[0008] FIG. B shows a back view of the present invention.

DETAILED DESCRIPTION OF THE INVENTION

[0009] As shown in FIG. A, a desk embodied in the present invention is composed of a desk top approximately 36 inches (1), a consumer chosen child themed panel, ie: butterfly approximately 36 inches (2) attached to the desk top to support the flush mounted computer screen approximately 20 inch dig(3), keyboard and mouse tray approximately 27 inches (4), a door with lock under the desk for storage approximately 9 inches (5) including a shelf for computer and printer, support panels approximately 23x16 inches (6) under desk perpendicular to desk top and a privacy panel approximately 36x17 inches (7). The keyboard and mouse tray (4) is attached to the desk top (1) with drawer slides.

[0010] The desk top (1), support panels under desk perpendicular to desk top (6), privacy panel (7) and storage (5) are connected by a cam and bolt assembly. The consumer chosen themed panel (2) is attached to the desk top by L brackets.

[0011] As shown in FIG. B, the storage area under the desk (5) is vented to allow proper ventilation for the computer components and includes access to all cords. The flush mounted screen (3) is accessible from the back of the desk for proper installation and is connected by screws in to the frame.

[0012] The embodiments of the present invention described above are to be deemed in all respects as being merely illustrative and not restrictive. Accordingly, the present invention may be embodied in other specific forms without deviating from the spirit thereof. The present invention is therefore limited only by the scopes of the following appended claims.

Sequence Listing

[0013] 1. Desk top

[0014] 2. Consumer chosen theme panel

[0015] 3. Flush mounted computer screen

[0016] 4. Keyboard and mouse tray

[0017] 5. Hinged door on storage area

[0019] 7. Privacy panel

What is claimed is:

1. A child computer desk with a panel designed to resemble a child's bedroom theme which includes a flush mounted monitor within the theme panel (ie: butterfly).

2. A child computer desk with a locking door for storage of computer components.

The child computer desk as defined in claim 1 will be versatile in design such that different themes can be accommodated to complement a child's room. This panel will be painted with colors that will compliment the theme and child's bedroom.

The child computer desk as defined in claim 2 will act as a space saving solution and protect the components against damage and misuse and allow parental control.
