Title: USER INTERFACE FOR HANDLING CALL QUALITY IN A COMMUNICATION SYSTEM

Abstract: A method of controlling communication quality between one node and at least one other node in a packet switched communication system, the method comprising the steps of detecting at one of said nodes a condition that indicates that communication quality is below an acceptable threshold, automatically generating instructions based on the detected condition for a user of the at least one node, said instructions intended to provide a remedy to improve the communication quality, and receiving input from a user of the at least one node responsive to the instructions to implement the remedy and thereby improve the communication quality.
Published: with international search report

Date of publication of the international search report:
3 January 2008

For two-letter codes and other abbreviations, refer to the “Guidance Notes on Codes and Abbreviations” appearing at the beginning of each regular issue of the PCT Gazette.
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

H04M

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic database consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, INSPEC, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents:
  *A* document defining the general state of the art which is not considered to be of particular relevance
  *E* earlier document but published on or after the international filing date
  *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  *O* document referring to an oral disclosure, use, exhibition or other means
  *P* document published prior to the international filing date but later than the priority date claimed

*“T” later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

*“X” document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

*“Y” document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

*“&” document member of the same patent family

Date of the actual completion of the international search

25 September 2007

Date of mailing of the international search report
