# UNITED STATES PATENT OFFICE.

CHARLES B. MACNEAL, OF PHILADELPHIA, PENNSYLVANIA, ASSIGNOR TO  
ELIZABETH MACNEAL, OF SAME PLACE.

## DESIGN FOR A GAME-BOARD.

SPECIFICATION forming part of Design No. 23,025, dated January 30, 1894.

Application filed November 6, 1893. Serial No. 490,164. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, CHARLES B. MACNEAL, a citizen of the United States, residing at Philadelphia, county of Philadelphia, and State of Pennsylvania, have invented and produced a new and original Design for a Game-Board, of which the following is a specification, reference being had to the accompanying drawing.

My design is fully illustrated in the drawing, in which—

A, is a flat surface of a game board upon which the design is shown.

B, are circular marks which form the ends or points of the design. C, are similar circular marks between the intersecting lines of the ovals and D, are the curvilinear lines of the design which form the ovals.

My design consists of a succession of intersecting curvilinear lines forming a series of 20 oval configurations presenting five (5) outer ends or points, each one of which terminates in a small circular mark, and at intervals between the crossing or intersecting lines forming the ovals, about midway their extent, are 25 similar circular marks.

What I claim is—

The design for a game board herein shown and described.

CHARLES B. MACNEAL.
