— with international search report

(88) Date of publication of the international search report:

28 June 2007

For two-letter codes and other abbreviations, refer to the "Guid-  
ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: LUMINESCENT GREEN USING A DYE, INK OR PAINT AND LUMINOUS PIGMENT

(57) Abstract: The invention concerns a composition of a liquid and a solid substance in which a luminous pigment is worked up, consisting of SrA 1204:Eu, Dy, but can also consist of a sulfide composition, or be made of alkaline rare earth, or other materials such as calcium, strontium, barium, or each pigment capable of beaming back visible light into the dark, by dispersing these luminous pigments into a synthetic or nonsynthetic solution, such as an acrylatesolution consisting of water, emulsionfier E 650, white spirit, synthetic acrylate thickener, polyacrelatebinder, katalysator P and ammonia, or another composition of a solid substance and a liquid by which flowers, plants, trees, branches, and bushes can be applied with a luminous paint or ink in the dark, by dipping the flower in the concerning- composition or the flower with spray-guntechniques, aerosol, airbrush or other applicationtechniques apply with a paintcoat or ink in which the luminous pigment is worked up on or in a flower, plant, tree, branch or bush or other flora, or artificial flower, plant, branch, or bush that will emerge with a luminous effect in the dark, after the flower has absorbed artificial or daylight, by varying the colour of the luminous pigment a flower emerges, capable of shining in the dark in other colours, such as yellow-green, light blue, red or orange, the luminescent effect can be alternated.

**A. CLASSIFICATION OF SUBJECT MATTER**  
 INV. A41G1/00 C09K11/00 C09D5/22

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**Minimum documentation searched (classification system followed by classification symbols)  
 A41G C09K C09D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category*	Citation of document with indication where appropriate of the relevant passages	Relevant to claim No
X	US 6 264 855 B1 (KITAGAWA YOSUKE ET AL) 24 July 2001 (2001-07-24) column 8, line 33; claims 1,2 -----	1-3

 Further documents are listed in the continuation of Box C See patent family annex

## \* Special categories of cited documents

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubt on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

<sup>1</sup>T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

<sup>1</sup>X document of particular relevance the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

<sup>1</sup>Y document of particular relevance the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

<sup>1</sup>S document member of the same patent family
