(54) **Title:** POT LID HANDLE

Fig. 3

(57) **Abstract:** A larger handle (100) for a pot lid which extends a greater distance above the lid (12) central surface than in prior lid handles. As a result, the larger pot lid handle provides to a user the ability to grasp the handle (100) when the pot lid with handle oriented downward is resting on a surface without burning the users hand on the hot pot lid. When the pot lid with the handle is placed on a flat surface with said handle extended toward and in contact with the surface, and a surface portion of the pot lid is in contact with said surface, this handle design results in the pot lid resting at a much greater angle to said surface enabling the user to grasp it easily.
