A texturizing machine.

A texturizing machine (1), which can yield effectively bulked yarn for a reduced power input, comprises, within a head frame (2), a yarn path (8) extending between a pay-off bobbin (9) and a take-up bobbin (10), a plurality of feeders (16,17,18,19) arranged along said path (8) and interleaved to a first oven (13), a false twist spindle (14), and a second oven (15), as well as an air-blast interlocking device (26), wherein two feeders (17,18) are set close to each other but sufficiently apart to accommodate the air-blast interlocking device (26) therebetween.
