(54) Title: METHOD AND SYSTEM FOR SELECTIVELY TRACKING AND MONITORING ACTIVITIES

(57) Abstract: A system for selectively collecting location information in a tracking environment includes a first energy signal identification badge for detecting trigger signals and transmitting identification data signals indicating existence of a proximity condition between the first badge and a source of the trigger signals. The trigger source transmits trigger signals of a predetermined power level, wherein the first badge can detect the trigger signals only if the first badge is within a predetermined radius of the trigger source when the trigger source transmits the trigger signals. The first badge transmits the identification data signals when the first badge detects the trigger signals transmitted by the trigger source.

WO 2003/105095 A3

INTERNATIONAL SEARCH REPORT

International Application No

PCT/EP 03/05438

A. CLASSIFICATION OF SUBJECT MATTER
 IPC 7 G06F19/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
 IPC 7 G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal
