CLAIM

The ornamental design for a hand-held device with handwriting area, as shown and described.

DESCRIPTION

FIG. 1 is a first front perspective view of a first embodiment of the hand-held device with handwriting area with a lid in a closed position according to the present invention; FIG. 2 is a first back perspective view of a first embodiment of the hand-held device with handwriting area with the lid in the closed position according to the present invention; FIG. 3 is a first front perspective view of a first embodiment of the hand-held device with handwriting area with a lid in a closed position according to the present invention; FIG. 4 is a first back perspective view of a first embodiment of the hand-held device with handwriting area with a lid in a closed position according to the present invention; FIG. 5 is a first side view of a first embodiment of the hand-held device with handwriting area with the lid in the closed position according to the present invention; FIG. 6 is a first side view of a first embodiment of the hand-held device with handwriting area with the lid in the closed position according to the present invention; FIG. 7 is a bottom plan view of a first embodiment of the hand-held device with handwriting area with the lid in the closed position according to the present invention; FIG. 8 is a first top plan view of a first embodiment of the hand-held device with handwriting area with the lid in the closed position according to the present invention; FIG. 9 is a first front perspective view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position showing a first embodiment of a handwriting area according to the present invention; FIG. 10 is a first back perspective view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; FIG. 11 is a first front perspective view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; FIG. 12 is a back plan view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; FIG. 13 is a first side view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; FIG. 14 is a second side view of a first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; FIG. 15 is a bottom plan view of the first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention; and FIG. 16 is a top plan view of the first embodiment of the hand-held device with handwriting area with the lid extended in an open position according to the present invention.

Those aspects of the device shown in broken lines are for illustrative purposes only and form no part of the claimed design.
