UNITED STATES PATENT OFFICE.

HENRY J. HAIGHT, OF NEW YORK, N. Y.

IMPROVEMENT IN ARTISTS' SCRAPERS.

Specification forming part of Letters Patent No. 135,333, dated January 28, 1873.

To all whom it may concern:

Be it known that I, HENRY J. HAIGHT, of the city, county, and State of New York, claim to be the sole and original inventor of a certain tool or implement which I denominate the Artist's Scraper, the material, form, and construction, as also its uses, being set forth and described, reference being had to the drawing herewith sent, in the following specification:

First, my invention consists of a steel plate, the general form and shape being shown in Figure 1, the dimensions not being more than one-sixteenth part of an inch in thickness, and from one and one-half to two inches in breadth in its broadest part, and from six to seven inches in length. Second, upon this plate, Fig. 1, is a smaller, movable index-plate of metal, oval in form, and of suitable size and thickness, Fig. 1, J, to be moved laterally on a pivot, indicated thus, *o*, Fig. 1, K. Third, the letters *c c c c*, Fig. 1, represent a serrated edge, the several serratures being sharpened, and graduated in length from one-half inch to one and one-half inch, respectively. Fourth, the letter *m*, Fig. 1, also represents a sharpened edge, with a graduated scale of nine equal sixteenth parts of an

inch cut upon the surface, as shown, Fig. 1, by means of which, and by an adjustment of the index-plate, Fig. 1, J, any desired width of the sharpened edge, Fig. 1, *m*, may be obtained. Fifth, the sharpened edges *c c c c* and *m*, above referred to, are intended to be used in scraping off the wet paint from the outer edge or border of canvas painted upon, in order to obtain a clean surface or border of any desired width, surrounding a picture or painting, as represented in Fig. 2. *b b*, and Fig. 3, *d d*. Sixth, the sharpened edges *p p p*, Fig. 4, are intended to be used for the purpose of scraping and cleaning the pallet, as represented in Fig. 4.

I claim as my invention—

The sharpened edges *p p p* and *m*, as above described, and also the serrated and sharpened edges *c c c c*, with the movable oval-shaped metallic index-plate, Fig. 1, J, in combination with the graduated scale *m*, Fig. 1, as above described, and shown in the drawing.

HENRY J. HAIGHT.
