(54) Title: CABLE INSTALLATION ACCESSORY

(57) Abstract: The present invention relates to a cable installation accessory, which is advantageously used for installations of cables (2) in ship cabins. According to the invention the cables (2) are covered by a channel (1), which is fixed onto a mounting base. Thus the cables (2) remain in the space between the mounting base and the channel (1), i.e. in the recess of the channel. The recess may be filled with a filling part (4), which keeps the cables in place and at the same time acts as a fire preventing material. The longitudinal edges of the channel (1) provide mounting faces (3) for fixing the channel onto the mounting base.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
