The nature of the invention consists of placing a piece of cloth or non-woven material moistened with perfume or cologne in an air-tight packet to preserve the perfume or cologne and to provide convenient transport and allow for one-time usage when package is opened. Package is made of durable material that can be sealed air-tight similar to that of a moist towelette (cloth or paper that is moistened by a cleansing solution, not perfume or cologne).

The size of the perfume packet can vary and is meant to easily fit in a purse, pocket, wallet, briefcase, luggage or any other small personal item. Perfume packets could be tossed in the carry on bag without need for special consideration at airport security.

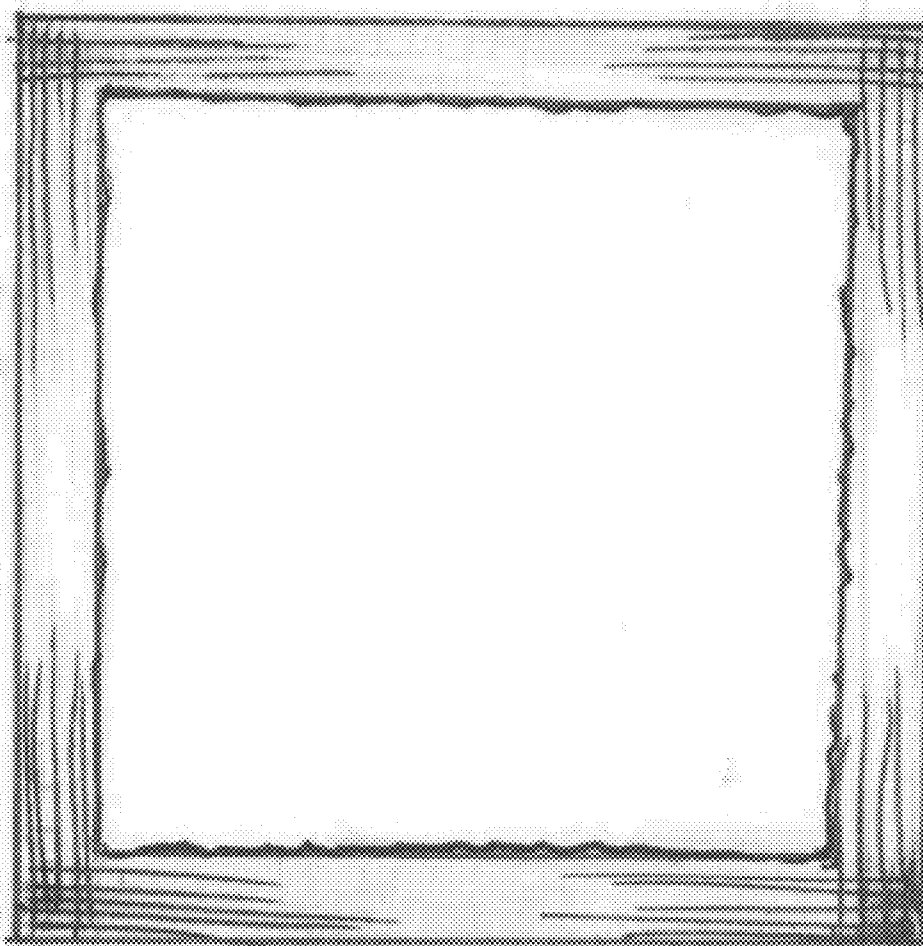

FIG. 1

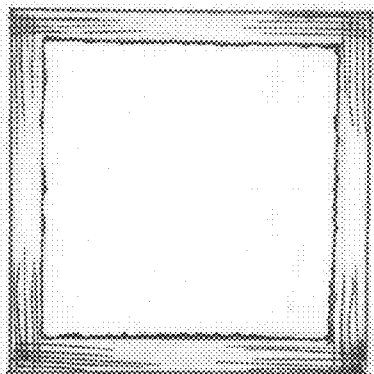

FIG. 2

FIG. 3

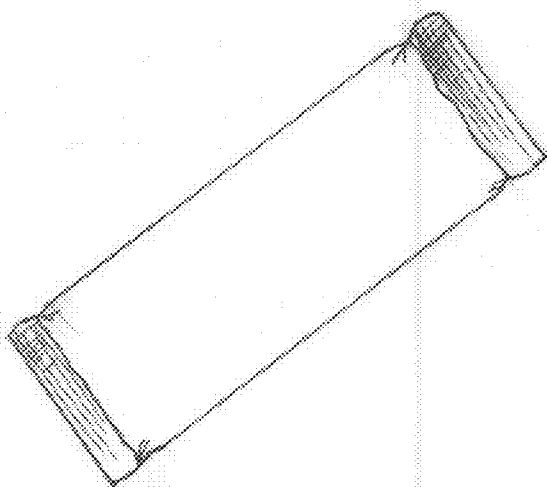

FIG. 4

**PERFUME PACKET**

[0001] The nature of the invention consists of placing a piece of cloth or non-woven material that contains perfume or cologne in an air-tight packet to preserve the perfume or cologne and to provide convenient transport and allow for one-time usage when package is opened. Package is made of durable material that can be sealed air-tight similar to that of a moist towelette. The packet could endure significant wear and tear from normal daily activities of where it is stored.

[0002] The size of the perfume packet can vary and is meant to easily fit in a purse, pocket, wallet, briefcase, luggage or any other small personal item. The packet would be less than 6 inches long or wide and would be less than ¼ inch thick. The ideal packet would be about 2 inches square and ⅛ inch thick.

[0003] With airport security measures related to liquids, a perfume or cologne bottle is not easily packed in a carry-on bag. A perfume or cologne bottle may be required to be enclosed in a quart sized bag that would need to include all liquids over a certain limit and would require additional hassle at airport security. Perfume packets could be tossed in the carry on bag without need for special consideration at airport security and leaving more room for other necessary liquid items.

**SUMMARY OF INVENTION**

[0004] The nature of the invention consists of placing a piece of cloth or non-woven material that contains perfume or

cologne in an air-tight packet to preserve the perfume or cologne and to provide convenient transport and allow for one-time usage when package is opened. Package is made of durable material that can be sealed air-tight similar to that of a moist towelette.

[0005] FIG. 1

[0006] Front view of a square shaped perfume packet.

[0007] FIG. 2

[0008] Side view of FIG. 1.

[0009] FIG. 3

[0010] Front view of a slender perfume packet.

[0011] FIG. 4

[0012] Side view of FIG. 3.

1. A travel size perfume packet consisting of a piece of cloth or non-woven material that contains perfume and sealed in an air tight packet to preserve the perfume and to provide convenient transport of perfume and allow for one-time usage when package is opened.

2. A travel size perfume packet consisting of a piece of cloth or non-woven material that contains high-end perfume and sealed in an air tight packet to preserve the perfume and provide convenience to allow for easy stow in carry-on bags for airplane travel or in a briefcase, handbag, or pocket and allow for one-time usage when package is opened.
