(54) Title: CONTEXT-SENSITIVE METHODS AND SYSTEMS FOR DISPLAYING COMMAND SETS

(57) Abstract: Methods and systems present commands to a user within a software application program by determining the user's context within the application program and automatically presenting in a user interface commands that pertain to the user's current context. When the user's context changes, the context-sensitive commands are automatically removed from the user interface. In one implementation context blocks and context panes are employed to present the commands.
