Title: DYNAMICALLY EDITABLE ELECTRONIC PRODUCT CATALOGS

Abstract: This document describes, among other things, systems and methods for managing a community-editable product catalog. In some embodiments, a system comprises at least one server; a first database, which includes at least one catalog entry that may be edited by a user of a client computer in communication with the server; and a second database, which includes at least one listing, which is associated with the at least one catalog entry. Other embodiments are disclosed.

**T**

- Further documents are listed in the continuation of Box C.

**T**

- See patent family annex.

**T**

- "T"-Symbol: further document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention.

**X**

- "X"-Symbol: document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone.

**Y**

- "Y"-Symbol: document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

**A**

- "A"-Symbol: document member of the same patent family.

**Date of the actual completion of the international search**

22 March 2007 (22.03.2007)

**Date of mailing of the international search report**

1 April 2007 (01.04.2007)
