(54) Title: SURFACE TREATMENT COMPOSITIONS COMPRISING SACCHARIDE-SILOXANE COPOLYMERS

(57) Abstract: A surface treatment composition comprising at least one saccharide- siloxane copolymer having a saccharide component and an organosiloxane component and linked by a linking group, wherein the saccharide-siloxane copolymer has a specified formula and the surface treatment composition is adapted to provide at least one benefit to a surface to which it is applied, is provided. Dispersions and emulsions comprising the saccharide-siloxane copolymer, and treatment compositions comprising the emulsions and/or dispersions are also provided. The invention further provides methods and articles of manufacture comprising the inventive compositions.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
