(54) Title: SYSTEM AND METHOD FOR MANAGING A REMOTELY LOCATED ASSET

(57) Abstract: A commercially viable solution for providing an asset management system that provides for accessing assets, tracking location of assets, managing OSHA compliance of the assets, and monitoring impact of the assets. The asset management system (115) may utilize system architecture having intelligent wireless devices (111) associated with the individual assets (105). The use of intelligent wireless devices allows for the asset management to operate and maintain functionality substantially without loss of data in the event of a loss of communication between the wireless devices and a management computing system via a network (119), including an out-of-range condition of the wireless devices with respect to a local monitor (110).
