DESIGN.

S. J. LARGE.

SPOON.

(Application filed Mar. 9, 1901.)

No. 34,341. Patented Apr. 9, 1901.

Inventor

Samuel J. Large, by

By his Attorney

Harry P. Wilkerson.

Witnesses

C. F. Kellogg

V. R. H. Scovel.
To all whom it may concern:

Be it known that I, Samuel J. Large, a citizen of the United States, residing at Bristol, in the county of Hartford and State of Connecticut, have invented a new and useful Design for a Spoon, of which the following is a specification.

The accompanying drawing, which forms a part of this specification, shows a spoon of my new design.

As shown in the drawing, the leading or material feature of the design is the roccoco ornamentation, consisting of shell and leaf motifs on the part of the handle that by lateral swellings with intermediate lateral depressions of increasing size increases in width from the shank to near the outer end, which decreases in width by a smaller series of swellings. A small rib 1 starts near the bowl and extends along each edge of the shank and terminates in a scroll 2 at the first swelling of the handle. Shell motifs 3 extend from the scrolls 2 to the larger end of a conventionalized Corinthian leaf 4, which covers the end of the handle. This cordate leaf has volute 25 veins 5, that begin in a helix 6 near the center of the leaf and extend outwardly toward the several lobes 7, the outer of which conform to the outline of the end of the handle. Along each edge and conforming to the outline at the widest part of the handle between the leaf and shell motifs is a vine-like leaf ornamentation 8. The space 9 between the shell motifs is left plain.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a spoon herein shown and described.

In testimony whereof I hereto sign my name to this specification in the presence of two subscribing witnesses.

Witnesses:

A. Harper,
G. C. Doherty.
