(54) Title: SELF-RETAINING TARGET ASSEMBLY

Figure 1A

Figure 1B

(57) Abstract: A sensor target assembly is provided for a body having an axial bore. The sensor target assembly includes a polymeric alignment positioning cylinder for insertion into the bore. Target material is provided which is mounted to the alignment positioning cylinder. The alignment cylinder can optionally have annular barbs.

A. CLASSIFICATION OF SUBJECT MATTER***F16H 63/30(2006.01)i, F16H 63/00(2006.01)i***

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

F16H 63/30; A61B 1/00; A61B 5/022; F16H 61/26; G01B 7/30

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

(Chinese Patents and application for patent)

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKOMPASS(KIPO internal) & Keywords: "hall sense" and "magnet"

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
