(54) Title: ERGONOMIC PLASTIC CONTAINER AND PACKAGE SYSTEM

(57) Abstract: A packing that includes a bottle and/or a bottle and box combination wherein the container may have a first handle portion, a second handle portion, and a bottom grip portion. The first handle portion can extend in a front to back direction and the second handle portion can extend in a transverse direction to the first handle portion. The bottom grip may include a protrusion and recess on the bottom of the container. The box can be configured to have openings to provide access to the first and second handle portions such that the container need not be removed from the box to utilize the contents contained therein. The box may also include a bottom opening and a push-up portion to provide access to the bottom grip portion.
