

UNITED STATES PATENT OFFICE.

JOHN E. MOYE, OF CLIFTON, CANADA.

IMPROVEMENT IN MEDICAL COMPOUNDS OR LINIMENTS.

Specification forming part of Letters Patent No. **147,858**, dated February 24, 1874; application filed January 26, 1874.

To all whom it may concern:

Be it known that I, JOHN E. MOYE, of Clifton, Ontario, in the Dominion of Canada, have invented a new and useful Composition of Matter to be used as a Liniment; and I do hereby declare the following to be a full and correct description of the same.

The liniment, for which I desire a patent, is composed of the following ingredients. The quantities and proportions given are those requisite to make a single gallon. Sassafras-oil, one-half ounce; castor-oil, one-half pint; tincture of arnica, one pint; tincture of wormwood, one pint; tincture of laudanum, one-fourth pint; tincture of blood-root, one pint; tincture of lobelia, one pint; oil of turpentine, two ounces; alcohol, one pint and a half. These several ingredients, mixed together in the ordinary manner, form a compound which is claimed to be useful for the cure of rheuma-

tism, sprains, bruises, burns and scalds, stiffness of joints, lame back, scald-head, salt-rheum, chilblains, running sores, sore throat, gathered breasts, sore nipples, fresh cuts, toothache, headache, and generally for the medical purposes to which embrocations of such a character are applied.

What I claim, and desire to secure by Letters Patent, is—

A liniment composed of the ingredients above enumerated, substantially in the proportions stated.

The above specification of my said invention signed and witnessed, at Clifton, this 24th day of January, A. D. 1874.

JOHN E. MOYE.

Witnesses:

R. S. CHILTON,
J. E. WHITMAN.
