(54) **Bag with resealing device**

(57) The present invention concerns a bag-type package (12) for perishable food products, in particular for baked products like biscuits, shortbread and the like, loosely packaged, having a mouth (20) hermetically sealed by at least one sealing line (21) and including a resealing device (10) of said mouth (20) when it has been opened so as to consume the respective products; said device comprises at least one hinge (10) with an upper wing (17) and a lower wing (18) fixed to a wall (14a) of said bag-type package (12) and hinged together to define a hinging axis (X-X) that is substantially parallel to said at least one sealing line (21) of said mouth (20), wherein, at a predetermined distance from said at least one sealing line (21), means (22) are provided for removably locking said at least one hinge (10) in a closed state, said upper wing (17) and said lower wing (18) of said at least one hinge (10) being juxtaposed.
