(54) **Device for application of powdery and/or granular products onto corresponding articles, in particular ceramic tiles, for decoration thereof**

(57) A device (1) for application of powdery and/or granular products on corresponding tiles (2) includes a conveying belt (3), having a plurality of recesses (3a), which define the design of a prefixed decoration and which receive the powdery and/or granular products and

drop these products onto the articles (2). A plurality of connecting grooves (30) connect longitudinally each of the recesses (3a), to the previous one and to the subsequent one, to facilitate introduction of the powdery and/or granular products into each of the recesses (3a).
