(54) Draft excluder particularly for wood doors

(57) A draft excluder, particularly for wood doors, includes a fixed profile with a substantially U-shaped transverse cross-section, which can be accommodated in a recess formed at the lower edge of a door, a movable profile which is provided with a sealing means and is inserted at least partially within the fixed profile, to which it is functionally connected by a means for automatic movement, which allows it to pass from a raised position to a lowered position during the closure of the door. An expansion-type coupling means is associated with the fixed profile in order to allow its anchoring within the recess, passing, during anchoring, from a closed condition, in which the means does not protrude from the fixed profile, to an open condition, in which the means protrudes laterally from the fixed profile, interfering with the recess.

The present search report has been drawn up for all claims

Place of search	Date of completion of the search	Examiner
Munich	30 January 2013	Weißbach, Mark

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
