(54) Title: VIRTUAL DATA CENTER FOR NETWORK RESOURCE MANAGEMENT

(57) Abstract: A system and a method for implementing a virtual data center. In which, the functions to be performed by a computer, and the access the computer equipment is required to have to the storage and network facilities, are decoupled from the hardware, and instantiated dynamically on any suitable computer equipment, without any manual intervention. In a virtual data center, all the physical resources are virtualized and arranged dynamically, to meet the functional requirements of the data center.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC: **G06F 15/177** (2006.01)

USPC: 709/220,222,221

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 709/220,222,221

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)  
EAST

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/US06/28551

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 24  
because they relate to subject matter not required to be searched by this Authority, namely:  
Computer program product is software per se.
2. ☒ Claims Nos.: 19-23  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  
undecipherable pseudo-code
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of any additional fees.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

### Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- ☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- ☐ No protest accompanied the payment of additional search fees.
