**(54) Method for making anatomic elements for supporting a foot and element made by this method**

(57) A method for making anatomic elements for supporting and/or containing a foot is characterized by comprising the following steps:

- preparation of an element composed of two containing sheets, with a solidifiable substance interposed therebetween in the fluid state,
- injection, at the time of use, of a catalyst for said substance through an aperture provided in said element,
- placing a foot on said element, and
- waiting for said solidifiable substance to solidify.
