(54) Title: PACKAGE AND METHOD

Fig. 1

(57) Abstract: A package according to the invention comprises a part (1) protecting the packaged product, packaging information (4), an independent temperature changing mechanism (2) and its triggering mechanism (3), by which triggering mechanism the user activates the temperature change of the packaged material into a use temperature without outside energy. The package comprises also a print (5) reacting to temperature which modifies the visible packaging information when the temperature has changed to the use temperature. The invention also comprises a method in which the package is used.
