CLAIM

The ornamental design for a flow conditioner flange, as
shown and described.

DESCRIPTION

FIG. 1 illustrates a front perspective view of a flow conditioner flange in accordance with a first embodiment of the invention having a circumferential groove disposed along the flange edge.

FIG. 2 illustrates a rear perspective view of the flow conditioner flange of FIG. 1.

FIG. 3 illustrates a front view of the flow conditioner flange of FIG. 1.

FIG. 4 illustrates a rear view of the flow conditioner flange of FIG. 1.

FIG. 5 illustrates a side view of the flow conditioner flange of FIG. 1.

FIG. 6 illustrates a front perspective view of a flow conditioner flange in accordance with a second embodiment of the invention having a circumferential groove disposed along the flange edge.

FIG. 7 illustrates a rear perspective view of a flow conditioner flange of FIG. 6.

FIG. 8 illustrates a front view of the flow conditioner flange of FIG. 6.

FIG. 9 illustrates a rear view of the flow conditioner flange of FIG. 6.

FIG. 10 illustrates a side view of the flow conditioner flange of FIG. 6.

FIG. 11 illustrates a front perspective view of a flow conditioner flange in accordance with a third embodiment of the invention having a circumferential groove disposed along the flange edge.

FIG. 12 illustrates a rear perspective view of a flow conditioner flange of FIG. 11.

FIG. 13 illustrates a front view of the flow conditioner flange of FIG. 11.

FIG. 14 illustrates a side view of the flow conditioner flange of FIG. 11; and,

FIG. 15 illustrates a side view of the flow conditioner flange of FIG. 11.

The purpose of the broken lines in the drawings is to illustrate environmental structure that forms no part of the design sought to be patented herein.
