Claim

The ornamental design for a cockpit user input device, as shown and described.

Description

Fig. 1 is a front perspective view of a cockpit user input device showing our new design;

Fig. 2 is a top view of the cockpit input device, with some environmental structure removed for clarity of disclosure; the bottom view forming no part of the claimed design.

Fig. 3 is a first side view thereof;

Fig. 4 is a second side view thereof;

Fig. 5 is a back view thereof; and,

Fig. 6 is a front view thereof.

The broken lines illustrate structure and environment that form no part of the claimed design.
