(54) Title: OBTAINING AND ASSESSING OBJECTIVE DATA RELATING TO NETWORK RESOURCES

(57) Abstract: In a network comprising a plurality
of network resources and at least one directory
server, the directory server containing information
with a predetermined level of trust about the network
resources, a method for automatically providing
a user device with information about a network
resource in communication with the user device.
The communication includes address information
about the network resource. The method comprises:
automatically retrieving information from the
directory server about the network resource in
communication; and automatically executing at least
one of a set of predetermined actions based on the
retrieved information.
