CONSTRUCTIVE ARRANGEMENT FOR A MANUAL OR AUTOMATIC LIFE-SAVING JACKET

The present invention refers to a constructive arrangement for a manual or automatic life-saving jacket particularly designed for nautical, aquatic or aerial activities over areas covered by water or swampy regions, said jacket comprising areas of two or more luminos or compartments (01) strategically positioned in a number of positions in order to maintain the head of the person wearing the jacket out of the water. These luminos or compartments may be filled with compressed gas, or a gas produced by a chemical reaction, or by a foam having a lower density than that of the water activated by sensors of manually activated (04) in order to allow a positive floating of the person wearing the jacket even when the user finds it difficult to maintain the floating action due to exhaustion, panic, muscular fatigue, muscular cramps, lack of air, heart failure, mal-de-mer, drowsiness, loss of consciousness or any other motive which may place the user in eminent danger.
before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
   IPC(2) : B62C 9/08
   US CL : 441/106
   According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
   Minimum documentation searched (classification system followed by classification symbols)
   U.S. : 441/88-124; 405/185-187

   Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

   Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category</th>
<th>Citation of document, with indication, where appropriate, of the relevant passages</th>
<th>Relevant to claim No.</th>
</tr>
</thead>
</table>

☐ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* A document defining the general state of the art which is not considered to be of particular relevance
  A earlier application or patent published on or after the international filing date
  L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  O document referring to an oral disclosure, use, exhibition or other means
  P document published prior to the international filing date but later than the priority date claimed
  T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
  R document member of the same patent family
