(54) **Cooling appliance having door hinge component**

(57) The present invention relates to a cooling appliance. A cooling appliance (100) includes a main body (101), a rotatable door (102, 102'), and a hinge component (1) connecting the door and the main body. The hinge component (1) includes a hinge axis (8), an adjusting member (3) used for adjusting the height of the door

relative to the main body, and a bushing (6) having at least one part accommodated in the door, where the adjusting member sits on the hinge axis. According to the recommendations of the present invention, the bushing is incapable of being rotatably sleeved outside the adjusting member relative to the adjusting member.

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 14 17 1530

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
