(54) Title: ONLINE MUSIC AND OTHER COPYRIGHTED WORK SEARCH AND LICENSING SYSTEM

(57) Abstract: Search and licensing systems and method for copyrighted works, such as music tracks, images, and video. The system may comprise a database that stores data regarding copyrighted works. The system may also comprise a search engine for allowing a user to search the database for copyrighted works. The system also comprises a licensing module that implements licensing negotiations between the user and a copyright licensor for a selected copyrighted work selected by the user. The licensing module may send an electronic quote request via email to the licensor in response from a license request from the user. The email may contain an activation link to a web site at which the licensor can enter a quote for a license to use the copyrighted work in accordance with use details input by the user. Also disclosed are systems and methods for automating licensing negotiations for copyrighted works detected and recognized in uploaded files (such as video files) to be distributed via the Internet or other communication networks.
