⑤④ Apparatus for drying hair with rotating heat sources.

⑤⑦ Apparatus for drying hair consisting of a circular, or any other shape, tubular support (1) with two or more adjustable infrared lamps (2) on hinges placed symmetrically along its edge, with said support joined, via two possible adjustable rods (4) or the like, along its axis to an electric motor (6) with reducer, which gives rise to continuous and timed rotation and allows the axis of rotation of the support to be moved in space, via a cam (8) or similar device, in a type of nutation, so as to allow said lamps to reach every point of the head underneath with their heat emission.

The present search report has been drawn up for all claims

Place of search
THE HAGUE

Date of completion of the search
13-02-1986

Examiner
SIGWALT C.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons
& : member of the same patent family, corresponding document
