(54) Title: MULTI USE BAG

(57) Abstract: The present invention relates and provides a versatile multi-use bag which can be configured to serve as a shoulder-side, frontal suspended, or neck suspended carrying bag, or as a rucksack. The bag comprises a multi-compartment openable body (16) to contain whatever items are to be transported by the user; an extended length strap (18) with attachment mechanisms (20) at both ends thereof whereby the strap can be releasably anchored to the body of the bag; a tunnel-like portion (26) attached proximate to an edge of the body wherethrough the strap can be inserted; and at least two spaced-apart anchor points (22/24) positioned proximate to the outer perimeter of the body whereto the strap ends may be releasably attached.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
