(54) Title: METHOD OF CALL ROUTING IN A PUBLIC/PRIVATE COMMUNICATION SYSTEM

(57) Abstract: A public/private communication system is provided which includes a public communication device (100), a private communication device (102) and a radio accessory extension (RAE) (200) coupled therebetween. The RAE (200) of the present invention provides audio and/or display capability which allows the public communication device to operate as a private communication accessory. Methods (300, 400, 500) provide for the configuration and prioritization of private and public calls through the three devices to ensure that private calls will take priority and public calls will be received on the public communication device and handled appropriately.
