Title: CONSEQUENCE BASED STORY BLOCK LEARNING SYSTEM

Abstract: An educational system and method, which may incorporate features of a book, ablock game, and/or a puzzle, with the purpose of teaching various principles or lessons. The inventive system includes a plurality of pieces of potentially different geometric shapes. The pieces (200) are sequential in nature and each block is associated with a portion of the story. As part of the story, a participant is asked various questions, allowing the participant to test their instincts and/or knowledge. Based on the decisions that are made, different faces of the blocks are set down. If the correct decisions are made, the end result is a structure, which by its textual, graphical, and/or sculptural appearance, as a whole, communicates an idea or concept. In variations of the invention, each piece has an instability feature, and when the participant incorrectly answers a question, the participant is directed to orient the piece in such a way with respect to one or more other pieces that an unstable structure is created.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
   IPC(7) : G09B 17/00
   US CL : 434/156,178
   According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic database consulted during the international search (name of data base and, where practicable, search terms used)
   EAST

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category</th>
<th>Citation of document, with indication, where appropriate, of the relevant passages</th>
<th>Relevant to claim No.</th>
</tr>
</thead>
</table>

☐ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* Special categories of cited documents:
   “A” document defining the general state of the art which is not considered to be of particular relevance
   “E” earlier application or patent published on or after the international filing date
   “L” document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
   “O” document referring to an oral disclosure, use, exhibition or other means
   “P” document published prior to the international filing date but later than the priority date claimed
   “I” later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
   “X” document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
   “Y” document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
   “S” document member of the same patent family
