UNITED STATES PATENT OFFICE.

EUGENE McLEAN LONG, OF PORT WASHINGTON, NEW YORK.

SCISSORS SHARPENER.

Application filed March 8, 1926. Serial No. 93,012.

The object of my invention is to provide a scissors sharpener which may be kept in a work-basket, or other convenient place, and used from time to time as occasion requires, to sharpen scissors. This object is accomplished by my invention, one embodiment of which is hereinafter more particularly set forth.

For a more detailed description of my invention, reference is to be had to the accompanying drawings, forming a part hereof, in which—

Fig. 1 is a perspective view of one embodiment of my invention;

Fig. 2 is a cross-section of the same with a scissor blade in place, the section being taken on the line 2—2 of Fig. 3, looking in the direction of the arrows; and

Fig. 3 is a sectional view, taken on the line 3—3 of Fig. 2, looking in the direction of the arrows.

Throughout the various views of the drawings, similar reference characters designate similar parts.

My improved scissors sharpener 1 is composed of a metal clip 2 shaped substantially as shown, with a loop or handle 3, outspreading flanges 4 and inwardly projecting ears 5 which form shoulders against which is held a file 6, as shown. From time to time this file may be removed and replaced by separating the flanges 4.

The use of my scissors sharpener is shown in Fig. 2 where a scissor blade 7 is shown resting on the flange 4 while its cutting edge is against the file 6. By moving the sharpener back and forth on the blade, or the blade back and forth on the sharpener, it is possible to sharpen a scissor blade with very great facility.

While I have shown and described one embodiment of my invention, it is obvious that it is not restricted thereto, but that it is broad enough to cover all structures that come within the scope of the annexed claim.

Having thus described my invention, what I claim is:

A scissors sharpener having a loop with four inwardly projecting ears and having outwardly projecting flanges, and a file held adjacent to the flanges and by the loop and against the ears.

In testimony whereof, I have hereunto set my hand this 3rd day of March, 1926.

EUGENE McLEAN LONG.
