(54) Title: TECHNOLOGICAL SOLUTION TO INTERVIEW INEFFICIENCY

(57) Abstract: A technique for job screening may involve providing a video-augmented resume. An aspect of the technique can include providing a teaser video builder to resume-building users to enforce rules regarding "teaser" video entry. Alternatively or in addition, video could be augmented to push data that would normally be acquired in interview forward in a hiring process. Another aspect of the technique can include providing a cue point editor that augments video with hyperlinks and special effects. A similar editor can be provided to reviewers that are available, for example, in a social network for resume-building users.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
