(54) Title: IMPROVED METHOD OF FABRICATION OF COLOR CHANGING MEDIUM LAYERS IN ORGANIC LIGHT EMITTING DEVICES RESULTING IN IMPROVED LIGHT EXTRACTION

(57) Abstract: A method is described for fabricating an organic light emitting device, which method comprises steps of providing a planar substrate, constructing a plurality of first electrodes on the substrate surface, constructing a set of walls in between the plurality of first electrodes, constructing a layer of organic light emitting material overlying the first electrodes, constructing a second electrode layer overlying the light emitting layer, and removing a portion of the walls that extends away from the planar substrate above the second electrode. Also described are organic light emitting devices fabricated according to the method.

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 H01L27/15 H01L27/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H01L H05B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
